# ANNUAL REPORT
of the
STATE SUPERINTENDENT
OF PUBLIC EDUCATION
to the
Legislature of Mississippi

1986

## STATISTICAL REPORTS

1984-85

State Department of Education
Jackson, Mississippi

Richard A. Boyd, Ed.D.
State Superintendent

MISSISSIPPI
STATE DEPARTMENT OF EDUCATION

Richard A. Boyd, Ed.D., State Superintendent of Education
Suite 501 Sillers Office Building • P.O. Box 771 • Jackson, Mississippi 39205-0771 • (601) 359-3513

January 4, 1986

To the Legislature of the of Mississippi:

In accordance with the requirements of Section 373-11 of the Mississippi Code of 1972, Annotated, I am pleased to submit to you the annual report of the Superintendent of Public Education for the fiscal year 1984-85.

The 1984-85 school year was an exciting one because many of the components of the Education Reform Act of 1982 began to be implemented. Pilot districts for the new school accreditation process were selected, the new teacher and administrator certification standards were put into place, the School Executive Management Institute was instituted and enjoyed great success, the first statewide eleventh grade competency test was adminstered, and local staff development programs were refined. In summary, it was a good year.

The reorganization of the State Department of Education has now been completed, and I think that we have an agency that will be highly efficient and productive. We are dedicated to the task of improving educational opportunities for the youth of Mississippi!

The new State Board of Education has now been in existence for 18 months, and I continue to be favorably impressed with their devotion toward solving the education problems that exist in this state. It is a rare meeting when every member is not in attendance, and that in itself speaks to their diligence.

We look forward to an even greater year in 1985-86. Much that we have been working on will be in advance stages of implementation, and I will continue to give you periodic reports as to the progress that we are making.

Sincerely,

Richard A Boyd

Richard A. Boyd, Ed.D.
State Superintendent of Education

# STATE BOARD OF EDUCATION
# 1986 LEGISLATIVE RECOMMENDATIONS

The State Board of Education endorsed the following recommendations:

* A uniform set of school laws
* Fiscal independence for all districts
* Appointment of all local superintendents
* The concept of equal funding for a minimum education program for all students including a mandatory minimum millage rate contribution from each district
* A grant/forgivable loan program for college students majoring in education with the State Department of Education designating the critical subject areas and the districts where teacher shortages exist
* Creation of a statewide management information system for education
* Additional professionals for the State Department of Education
* Transportation funds for kindergarten children
* Majority vote on school bond issues
* Reversal of the election mechanism for bond referendum
* Three mill levy for 10 years for short-term capital improvements
* Clarification of the mandatory tax levy for municipal school districts
* School building leasing bill
* Asbestos removal program
* Additional funding for new textbooks
* An increase in teacher assistant base salary of $500
* Flexibility on first grade enrollment date
* Additional funding for transportation
* AA certification in administration required for all superintendents
* A unified budget for the State Department of Education
* Increase in per diem for Accreditation Commission members
* Authorization for the State Board to meet at a place of its discretion
* Elimination of the Commission on School and College Registration
* Flexibility for county superintendents in paying clerical staff
* Amend the law to allow local board flexibility on hiring substitute teachers
* Amend the law to allow teaching experience in non-public schools or in other states to count in the determination of provisional teacher salaries

## ADMINISTRATION AND FINANCE

**N. F. Smith, Director**

**359-3525**

The Bureau of Administration and Finance is composed of multiple divisions. The Division of Fiscal Management and Administrative Services exercises financial control of all education funds and provides technical assistance for financial management to all recipients. The Print Shop and Mail Services are also an important part of this division. The Division of School Building and Transportation provides services to school districts in building construction and renovation as well as the transportation of students and driver safety education. The Division of Child Nutrition Programs provides services to all school food programs and non-school food programs in the State. The Division of Personnel Services provides services to all Department employees in personnel procedures and payroll.

This bureau has effectively directed and coordinated expanded services in the past year Ten employees in the area of fiscal management have been transferred to the bureau to affect full centralization of all departmental finances. The expanded education funds, totaling 912.3 million dollars, now administered in the Division of Fiscal Management Services include 65.9 million dollars in vocational education, 69.5 million dollars in Chapter 1 and 14.4 million dollars in special education programs. Five hundred and twenty five school district representatives were provided assistance in 11 follow-up workshops on the new financial accounting system. Mail services have been greatly enhanced and financial savings have been effected by the assignment of one person to this responsibility. The productivity and efficiency of the Print Shop has been increased by the leasing of a high speed copy machine.

## Transportation

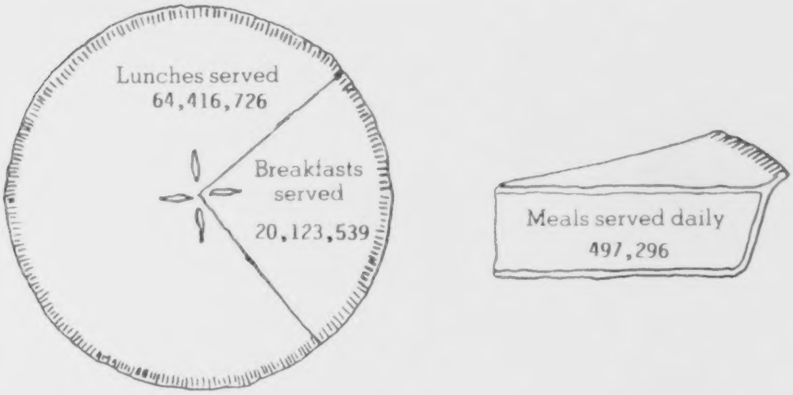
| | |
|---|---|
| Miles traveled | 42,158,697 |
| Pupils transported | 359,435 |
| Accidents | 40 |
| Injuries | 59 |
| Fatalities | 0 |

The Division of School Building and Transportation has effectively administered the state transportation program. Records show that 5,574 school buses transported 359,435 pupils to and from schools each day with an additional 3,500 special education students and 10,500 vocational students to vocational centers. The total annual miles traveled with no fatalities was 42,158,697  Training for regular and substitute bus drivers was provided to 9,500 persons. The driver education simulator moving and maintenance program was assumed from the Mississippi Safety Patrol. Driver education training was provided to 24,671 students with 9,000 of these being trained in the simulator program. Emergency assistance was provided to 14 coast area school districts in receiving federal disaster funds for hurricane damage.

The Division of Child Nutrition Programs has effectively administered a food service program for 154 school districts which comprise 946 schools and 191 non-school food service program sponsors. Students were provided 83.6 million meals and 18.9 million meals were provided to non-school programs  A training program in all phases of child nutrition was provided to 3,666 food service staff. School and non-school programs were reimbursed 98.8 million dollars with 15.4 million dollars in USDA donated foods provided to the schools.

The Division of Personnel has been active in coordinating and supervising the training of staff in the job performance evaluation process. They also provided valuable assistance in the development of the first complete personnel policies manual for the Department  A smooth transition in establishing one central payroll for the Department has been accomplished.

## Food Service



# ASSESSMENT AND COMPLIANCE

## Sarah Beard, Director

## 359-3486

The Bureau of Assessment and Compliance has varied responsibilities: the Division of Program Monitoring is responsible for monitoring the new Performance Based Accreditation System, including training external evaluators for site visits; monitoring of Chapter 1, Chapter 2 and Adult Education.

The Division of Program Reporting and Data Collection is responsible for functions as they relate to Certification and the developing and implementing of a Management Information System which will ultimately reduce the data burden of the Department and the local school districts.

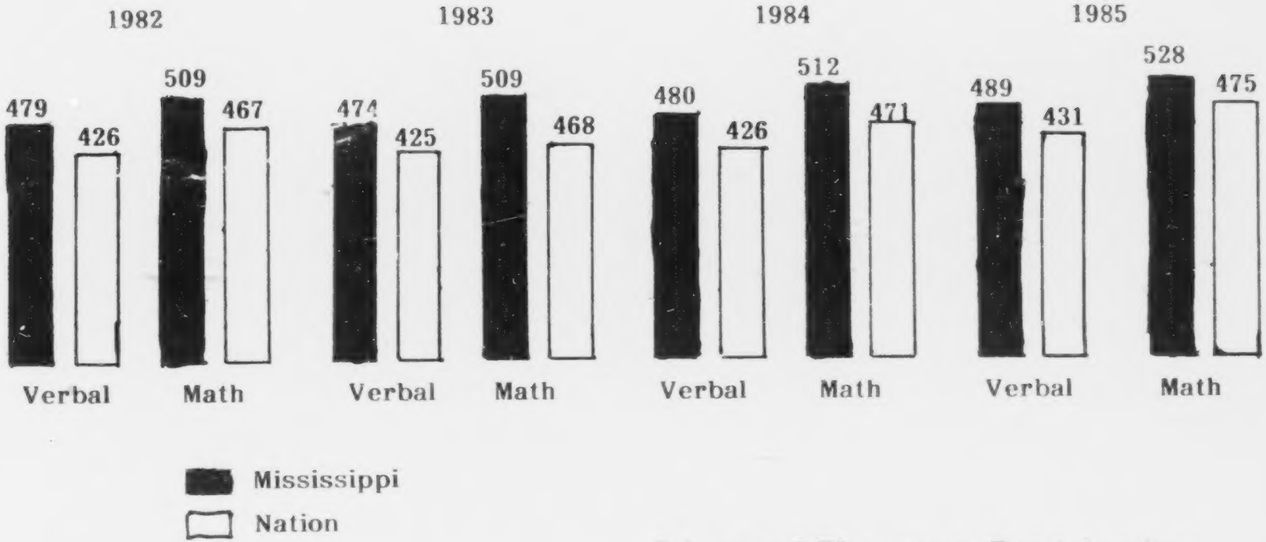
The Office of Statewide Testing is responsible for the administration of the Basic Skills Assessment Program (criterion referenced testing in grades 3, 5, 8, 11), the evaluation of the Teacher Assistant Program and the Kindergarten Program. The Data Processing Unit is also assigned to the Testing Division. This unit does all of the data processing for the Department. The Statewide Testing Program is off to a good start. The first administration of the Basic Skills Assessment Program occurred during the spring of 1985. It was administered to 11th graders as a part of the piloting of the program.

To fulfill the mandates of the law, the education reform monitors provided training for 286 prospective evaluators who will serve on the site visit team for performance-based accreditation. The pilot year will help us make an assessment on the new system of accreditation as well as the instruments used in gathering information about the system.

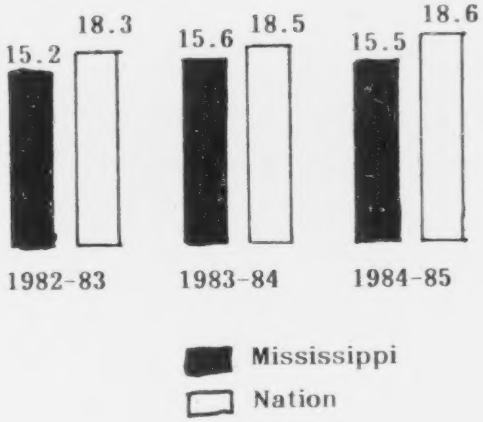
The first step in streamlining the functions of certification has begun so that we can render services to the public in a more timely and efficient manner. We have acquired computer equipment for this purpose and will discuss our plans with the deans of the schools of education and their registrars.

The Data Processing Unit and the newly established Management Information Unit have begun implementing the recommendations made by CDPA in their report on making processing and disseminating more timely and cost efficient.

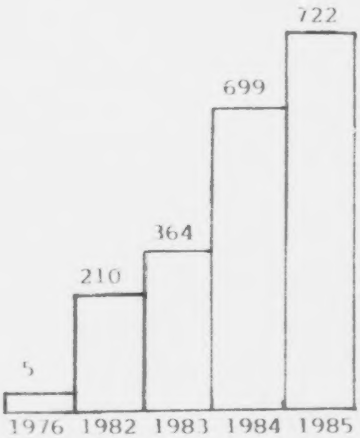
## SAT Scores



## ACT Scores



## Advanced Placement Participation



## BUDGET

**Judy Rhodes, Director**

**359-2038**

The overall mission of the Bureau of Budget is to develop and maintain an annual budget for the State Department of Education which reflects the educational priorities as established by the State Board of Education and the State Superintendent. In carrying out this mission, the Bureau of Budget must provide accurate and timely informatio in regard to budget matters to the State Fiscal Management Board and the Legislative Budget Office, as well as to other bureaus within the Department. The Bureau of Budget must also develop and maintain internal policies and procedures to assure proper implementation and control of all SDE budgets.

Since the establishment of the Bureau of Budget in March 1985, the following major tasks have been accomplished:

Development of the Fiscal year 1987 SDE budget to include extensive internal review and adjustment prior to submission.

Establishment of quarterly budget review meetings with each bureau to: (a) discuss current expenditures and projected needs for each program, and (b) make budget amendments where necessary.

Development of procedures for the SDE to improve budget and program management.

## EXTERNAL RELATIONS

**Andy Mullins, Director**

**359-3515**

The Bureau of External Relations is responsible for internal and external communications, media relations, publications, photography, public service announcements, and marketing for the Department. Bureau staff members serve as liaisons to the Legislature, other state agencies, educational and civic organizations and the general public. The bureau coordinates a number of special projects for the agency, such as the Teacher of the Year, Teacher In Space and the monthly State Board Recognition Program.

Bureau highlights for the past year would have to include the establishment of a close working relationship with both chambers of the Mississippi Legislature. For the first time, the Department had a single legislative effort which was coordinated through one office. The culmination of this effort resulted in the development of a brochure outlining the State Board of Education's legislative recommendations. Such a document had never been produced.

Recognition of outstanding achievement is another area of which the bureau is proud. At each meeting of the State Board of Education teachers, students, administrators, schools and/or school districts are honored for their performance. Over the past fiscal year, the Board honored 50 students, teachers and administrators from 30 schools in 30 different school districts for their achievements.

## JUNIOR COLLEGES
**Dr. George Moody, Director**
**359-3520**

The Bureau of Junior Colleges is charged with the general functions of implementing the state's legislative programs and executive policies for the public junior colleges.

The bureau serves as the executive arm of the Junior College Commission and is primarily concerned with coordination of instructional activities and maintaining standards of quality in the public junior colleges.

The director of the bureau assumes leadership responsibility for matters involving legal, financial, general administration and legislative affairs of the junior colleges. He works with junior college boards of trustees, presidents and business managers.

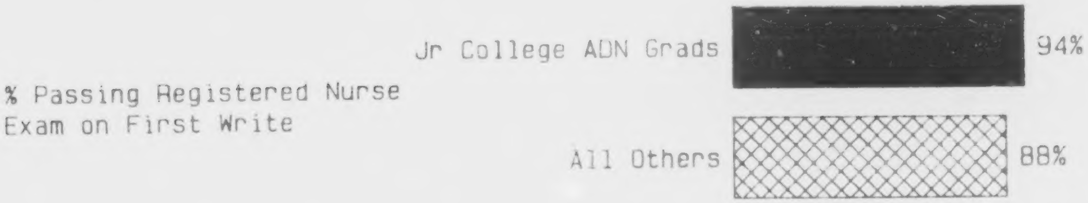
The education specialist senior is assigned primary responsibility for matters related to instructional programs, student services and student activities. He works most directly with deans of instruction, deans of students and sponsors of student activities.

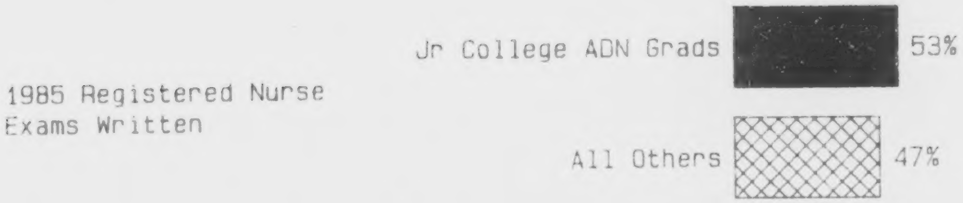
The education specialist has responsibility for the development and implementation of a comprehensive information system for junior colleges. He directs the collection of statewide data efforts with local officials.

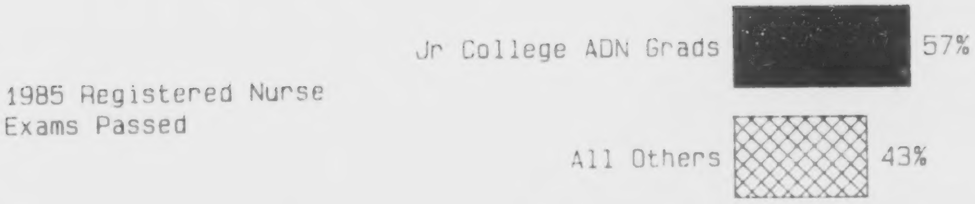
All staff personnel conduct on-site enrollment audit visits to junior colleges in the fall and spring terms, and engage in the preparation of the annual budget request for junior college support. They are generalists with delegated responsibilites described above.

The bureau provides services dealing with 58,000 students and 4,000 employees in the fifteen junior college districts.

Graduates of Associate Degree Nursing programs operated by Mississippi public junior colleges continue to perform well on the state's nursing examination. Passage of the examination is required for graduates to become registered nurses in the state. Over ninety-four percent of the junior college ADN graduates passed the state exam on the first write. This percentage compares favorably with the overall passing of eighty-eight percent by all persons taking the exam. Four of the junior college programs - Gulf Coast at Jackson County, Holmes, Northeast Mississippi and Southwest Mississippi - along with the baccalaureate program at Mississippi University for Women had 100 percent passing rate this year. The Northeast Mississippi Junior College Program also had 100 percent passing in 1984. Junior college graduates accounted for 507 or 53% of the 1985 registered nurse examinations written and for 478 or 57 percent of those passing the exams.







## PLANNING AND POLICY
**Dr. Ron Love, Director**
**359-3598**

The Bureau of Planning and Policy is responsible for the State Department of Education's Five Year Plan, Chapter 2, grants, research and development of short and long-range planning.

Highlights include developing the Department's first Five-Year Plan for Education in Mississippi. This document, which will be updated annually, includes the Department's goals and recommendations for the public school system in Mississippi.

This bureau developed a proposal for a dropout prevention model program which was submitted to the Department of Health and Human Services for funding in FY 1987.

The bureau established a method to work with other agencies to develop joint-funded programs for education to maximize efficient use of federal and state funds. A clearinghouse for information on grants and private foundations which have funds available for educational programs has also been established.

## SCHOOL EXECUTIVE MANAGEMENT INSTITUTE
Dr. Alan Evans, Director
359-3506

The function of this bureau is to manage the development and delivery of administrative and management skills training programs for approximately 2,000 school administrators in Mississippi. This process includes coordinating program direction, managing contractual development of training programs, scheduling of all Institute program components, preparing trainers for program delivery and monitoring and assessment of all Institute programs. The programs for which this bureau are responsible include administrative skill training in the following areas: the Beginning Administrator Program, the Administrator Board Certification Program, the Senior Administrator Program, three annual "Up-Date" sessions, an annual Superintendent's Conference, a pilot "Principal's Assessment Center" Program, and the production and analysis of Administrative Studies on a statewide basis.

The focus of the initial series of administrative training programs was to increase the knowledge and awareness levels of school leaders concerning the relationships among the programs in the Mississippi Education Reform Act, the School Effects Research and the leadership skills needed for establishing effective school programs. Between January and May of 1985, 139 training sessions of the Institute were conducted. More than 2,300 school administrators participated in these sessions of which 2,000 administrators each participated in four one-day sessions. These administrators included superintendents, district level staff, principals and assistant principals from all accreditated schools, both public and private.

During the initial Institute series of training, all administrators were provided instruction in 17 major skill areas including the five correlates of an effective school, a review of the total Mississippi Education Reform Act by program area, a study of "Power Management" leadership skills, the skills needed for creating a positive school climate, and the skills needed for effectively measuring school outcomes. Approximately 95 percent of the Mississippi school administrators demonstrated overall knowledge level mastery of the major concepts and skills studied. More than 94 percent of the administrators rated the sessions "excellent" or "good".

## SCHOOL IMPROVEMENT
**Dr. Ralph Brewer, Director**
**359-3768**

The Bureau of School Improvement has two divisions, Program Development and Program Implementation.

The Program Development Division initiates, develops, analyzes and refines new programs and services that are designed to improve the effectiveness and efficiency of educational programs and professional staff performance in local school districts and other educational agencies.

The Program Implementation Division assists local school districts and other educational agencies with institutionalizing, monitoring, evaluating and modifying the delivery of new programs and services that are designed to improve the effectiveness and efficiency of educational programs and professional staff performance.

This bureau is responsible for kindergarten, assistant teachers, district staff development programs, accreditation evaluation instruments, statewide curriculum structure, subject matter mastery, personnel appraisals and compensation and is a liaison to schools of education in institutions of higher learning.

During the early months of this year the Bureau of School Improvement continued to provide staff for the Commission on School Accreditation in the completion and refining of the proposed performance-based school accreditation program. This culminated in a series of eight public hearings in October 1984.

Further research and development based on comments made during the hearing process resulted in acceptance by the State Board of Education of The Requirements of the Commission on School Accreditation: Policies, Procedures, Regulations and Standards of Performance in May 1985. Work on evaluation instruments and a system for field-testing the accreditation process began immediately after Board acceptance and continued through the year.

In support of the Commission on Teacher and Administrator Education, Certification and Development the staff did research and development, held eight public hearings and further refined the requirements of Teacher and Administrator Education, Certification and Development. The program was adopted by the State Board of Education in May 1985. Work is underway on field testing the program and on development of attendant instruments and support materials.

Development of a curriculum structure for the state was continued and, with the assistance of the various organizations which represent the subject area disciplines, a draft was near completion by June 30, 1985.

Staff development plans were received from each public school district and each volunteering non-public school. These plans were reviewed and submitted to the Commission on School Accreditation for approval. Many plans were returned to districts for modification prior to final approval.

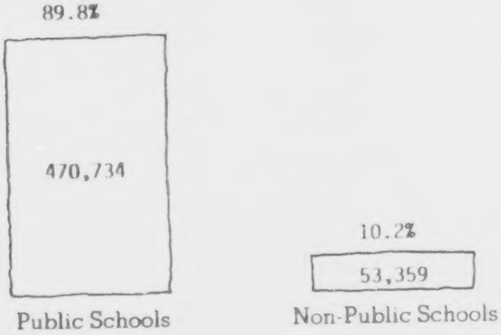
Materials needed to implement a pilot kindergarten program were developed. One hundred eight school districts applied and were approved for pilot programs. Development of an evaluation model was begun which will assess the effectiveness of the program.

The Mississippi Reading Improvement Program (Assistant Teacher Program) placed an assistant teacher in each first and second grade classroom. Evaluation of the program effectiveness continues. Early studies indicate a high degree of acceptance and effectiveness.

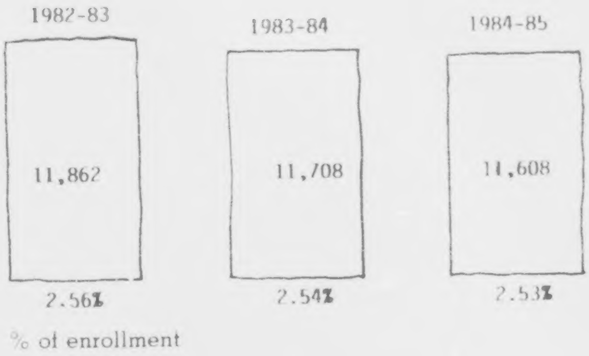
Other accomplishments included providing support to the Personnel Appraisal and Compensation Committee, completing the Mastery of Subject Matter Study, providing staff for the Mellon Project and the production of numerous other materials.

Staff members participated in programs in school districts and in programs by professional organizations which were designed to bring about more effective implementation of the Education Reform Act of 1982.

### Enrollment (1985-86)



### Dropouts



## SPECIAL SERVICES

**Dr. Walter Moore, Director**
**359-3498**

The Bureau of Special Services is divided into five divisions, four of which are responsible for the exceptional student programs. The four exceptional student divisions are responsible for programs, assessment and seven Learning Resource Centers. The fifth division is responsible for Chapter 1, the National Diffusion Network, Administrative Computer Assistance, Bilingual, Immigrant, and the Race Desegregation Project.

Programs for exceptional students continue to grow in numbers and quality. The handicapped child count for 1984-85 was 50,879; there were also approximately 12,438 gifted/talented students served in 122 school districts. There were 3,677 teachers assigned to serve these students including 437 teachers of gifted/talented.

For many years now, personnel in the Department of Vocational Rehabilitation and the special education part of the State Department of Education have worked to improve vocational options available for handicapped students. During the past three years, major strides have been made in providing opportunities for handicapped students to have work experience at Allied Workshops all over the state. This experience is helping handicapped students acquire employability skills and is resulting in employment for many of them. Additional work and continued cooperation will improve this program option. Other vocational options, including programs funded with the vocational set aside funds for handicapped students, are being provided; expansion is still needed in this area.

More than 30,000 students were determined to be eligible/ineligible by Screening Teams; this included 22,628 completed by the Exceptional Student Learning Resource Centers. The assessment capabilities of people involved in this process continue to improve resulting in improved quality of the assessment data used to determine eligibility and program placement for handicapped and gifted/talented students.

Many local school district personnel are utilizing computers to manage their special education programs. Some 75 local districts are now using a special education student data collection program which computes the information for most of the data which has to be submitted to the State Department. Others have programs which they use to help develop a handicapped student's individualized education program (IEP).

More than 100,000 students who were in need of additional instructional help in order to overcome academic deficits were served in the Chapter 1 program. Most direct services were in the area of mathematics, reading and/or language arts. As the Reform Act requirement for a teacher assistant in the first three grades has been implemented, there has not been as much need for Chapter 1 services in the lower elementary. Therefore, many districts have had enough funds to enable them to begin to serve eligible students in the junior high and high school. Chapter 1 funds continue to be used to support kindergarten activities; the need for teachers in this area will be reduced as the State funds kindergartens.

## VOCATIONAL-TECHNICAL EDUCATION

**Elwyn Wheat, Director**

**359-3088**

The Bureau of Vocational-Technical Education is comprised of four major divisions. Program Operations is the largest division, with the responsibility for most technical assistance to local schools. This staff is responsible for programs in Agriculture, Business and Office Education, Distributive Education and Marketing, Health Occupations, Home Economics, Industrial Arts, Trade and Industrial Education, and Technical Education. Long term vocational programs are administered in this area.

The Supportive Services Division is responsible for Vocational Guidance, Adult Basic Education, Remedial Programs, Staff Development, Sex Equity, Office of Civil Rights Compliance and Coordination of Teacher Education Activities.

The Resource and Coordination Division is responsible for equipment purchase, inventory and transfer, performance review, planning, certification, construction and overall resource management.

The Industrial Services Division's responsibility is in the area of coordination of federal programs (JPTA), specific industrial training and adult vocational programs. This division is responsible for short term or temporary vocational programs.

The past year has seen substantial change take place in the Vocational-Technical Bureau of the State Department of Education. These changes include final approval and implementation of the Strategic Plan for Vocational-Technical Education, the termination of the separate Board for Vocational-Technical Education, therefore reverting to the authority of the State Board of Education, and the reorganization of the Bureau as a result of reorganization of the State Department of Education.

The Strategic Plan for Vocational-Technical Education in Mississippi is the result of a strong effort on the part of the Vocational Board to analyze and assess the needs of the users of vocationally trained people in Mississippi to determine the direction for such training into the 21st century. It is a comprehensive look at vocational education from junior high through the technical programs at the junior college level, and provides redirection of specific training programs toward economic development of the state by better meeting the training needs of business and agriculture.

The Vocational-Technical Bureau operated under the authority of the Vocational-Technical Board until June 30, 1985. At that point the bureau reverted to the authority of the State Board of Education, and a result experienced reorganizational changes that have streamlined the operation and increased efficiency and delivery potential of the bureau. The finance component for vocational education was shifted to the Bureau of Administration and Finance, while Adult Education and staff development were shifted to the Vocational Bureau. There were also several reorganizational changes within the Vocational-Technical Bureau itself.

| 1984-85 | 616 | 443 | 1,059 | 1 |

**Definition:** A school is a division of the school system consisting of a group of pupils composed of one or more grade groups, organized as one unit with one or more teachers to give instruction of a defined type and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant.

## SCHOOL ACCREDITATION
### 1983-84

The term "elementary school" refers to the first six grades but may include, depending on organization, the first seven or eight grades. The term "secondary school" refers to a school which includes any combination of grades seven through twelve. By this definition all junior high and high schools are secondary schools.

| | Secondary | Elementary | Special Schools |
|---|---|---|---|
| Accredited: | | | |
| Public | 358 | 605 | 23* |
| Nonpublic | 46 | 79 | |
| **Total Accredited** | **404** | **684** | **23*** |

Reporting for accreditation is done on a prescribed organizational pattern. Frequently a school that includes grades 1 - 12 will report to the accrediting agency as three separate organizations: grades 1 - 6, 7 - 9 and 10 - 12. Consequently, the number of schools accredited is always at variance with the total number of schools in other tables.

*Special schools are those which serve exceptional children.

| **TOTAL** | **11,708** | **2.54** | **11,608** | **2.53** |

Note: The dropouts on this page represent the number of dropouts in a given year as a percent of the enrollment. Many of these children return to school the next year and possibly dropped out again the next year. Pages 35 & 36 should be studied to get the true picture of the number of pupils who start school in grade one and stay in school to graduate. Page 36 shows the number of fifth graders who remained in school and entered the twelfth grade seven years later.
